

When you choose BCR-Therapie today, you boost health and revenues tomorrow.

Yes, cybernetic pain management technology is a serious investment. It's also true that BCR Therapie provides certain patients ultimate relief that conventional methods simply cannot. Just imagine the results this clinically proven technology will have on your patients and their families.

Let BCR-Therapie put you in the best position to help, heal, and succeed – with your patients and your bottom line. First, you'll receive far more than just advanced equipment. You have our commitment, in both in warranty and in training. Our 5-year warranty includes one full replacement (if needed) at no cost. Even better, you and your staff receive full comprehensive training and support.

The Clinic-Master. Made in Germany.

- Provides a viable solution when conventional modalities are not enough.
 - Fully developed and made in Germany.
 - Latest cybernetic technology with Artificial Intelligence.
 - Digital diagnostic cum treatment system.
 - Simple and quick to learn and operate.
 - Reduction in pain seen right from the first session.
 - Clinically proven.
 - ISO 13485 certified production.
 - ATP Increases +500% *
 - Protein synthesis +73% *
 - Membrane transport +40% *
- * Cheng PhD 1982; Clinical Orthopaedics

FOR THE 1.5 BILLION PEOPLE GLOBALLY SUFFERING FROM CHRONIC PAIN, IT'S TIME TO TURN THE PAGE AND DISCOVER ULTIMATE RELIEF.

BCR-Therapie[®]

Biological Cell Regulation Therapy

When conventional methods leave you and your patients wanting more...introducing a new way to treat pain and speed healing.

Chronic pain damages far more than just the individual. It hurts families, too. And businesses with billions lost in productivity. It also hurts our healthcare system and world economies at over a trillion dollars in annual costs across the globe.

Patients seeking treatment and remedies from chronic pain continue to increase. Why exactly? Many reasons including an affluent, aging population working beyond their retirement age, increased sporting activities across all age groups and more.

So where can patients turn and trust for quick and consistent relief? There are many pain treatment modalities used

in the hospitals today; however, doctors and therapists are regularly challenged by some patients who do not respond fully to all these conventional modalities. What's more, even those patients who do see relief often demand faster and more predictable results from their treatments.

Fortunately, there's a new, patented and proven solution, BCR-Therapie. It comes from a country known for its technology, innovation and precision – Germany.

Why cybernetic pain management technology?

BCR-Therapie is a new 'cybernetic' pain management technology developed in

How top professional athletes keep their winning edge.

For pro athletes, their health and earnings potential are directly linked. That's why they trust BCR-Therapie to maintain top performance, as well as to reduce pain and speed recovery from a variety of sports injuries.

Germany. The technology is an effort to produce a replica energy that closely resembles our body's own energy. This is then applied on the pain affected area which provides the energy (ATP) for cells to regenerate at a much faster rate. Regenerated healthier cells have two very important contributions, in reducing inflammation and speeding up recovery of injuries and physical

disabilities. Therefore the applications of BCR-Therapie are effective in:

- Quick reduction of pain problems from accidents, surgeries, sports and degenerative illness.
- Speedy recovery from injuries and disabilities (accidents, surgeries, stroke recovery).

60 programmed treatments and unlimited healing benefits. Here's just a sample...

GENERAL PATIENTS

- Slipped Disc
- Neck/Shoulder Pain

SPORT RELATED PATIENTS

- Injury and Post Surgery Healing
- Muscle Stimulation
- Muscle Regeneration

SENIOR PATIENTS

- Arthritis

- Chronic Joint Pains
- Stroke Recovery
- Parkinson's Disease
- Diabetic Wound Healing

ACCIDENT PATIENTS

- Injury/Fracture Pain and Healing
- Post Surgery Healing

CANCER PATIENTS

- Pain Management

- Regeneration to mitigate effects of Chemotherapy

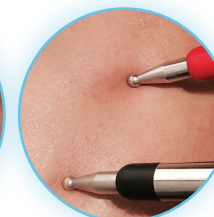

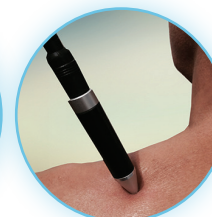

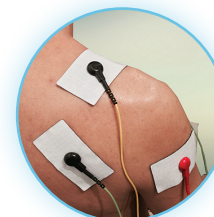

WELLNESS

- Detoxification
- Regeneration

AESTHETICS

- Face Therapy
- Fat Reduction

Cybernetic treatment. Artificial intelligence. Diagnostic capability. And more.

BCR-Therapie cybernetic treatment system obtains live biological feedback from the body, it has the ability to auto-adjust to this feedback. This substantially

Better diagnostic ability means fewer human errors. Today, most medical devices can't diagnose and treat simultaneously. Since the

improves treatment results due to less dependence on a therapist's knowledge and skill.
